

**Mitsubishi Electric US, Inc., Elevator and Escalator Division Introduces
Diamond-Trac® Streamline for Passenger Elevators and
Debuts New Elevator Configurator Tool**

CYPRESS, Calif., March 31, 2026 – The Elevator and Escalator Division of Mitsubishi Electric US, Inc., (Mitsubishi Electric), headquartered in Cypress, California announces the introduction of the **Diamond-Trac® Streamline Machine-Room-Less (MRL) Elevator System**, a new pre-engineered solution designed to simplify design selections and optimize procurement and logistics while maintaining Mitsubishi Electric’s high standards of quality, performance, and reliability.

The Diamond-Trac® Streamline system combines Mitsubishi Electric’s proven engineering and premium components with pre-designed features that help reduce costs and shorten manufacturing lead times. Designed with efficiency in mind, the system offers a focused selection of design options with limited customization - making it an ideal solution for projects that demand speed, consistency, and performance.

To further simplify the design process, Mitsubishi Electric is also introducing a new Elevator Configurator Tool, a web-based platform that guides users through the system-selection process. The tool enables users to configure basic or project-specific elevator systems, select preferred design options, and instantly receive detailed drawings to support planning and project coordination.

The Elevator Configurator Tool’s primary objectives include:

- Providing an easy-to-use, web-enabled elevator configuration experience
- Allowing customers to configure standard designs as well as more advanced detail suiting the users project specific needs
- Delivering detailed layout drawings for each configuration
- Enabling users to select a configuration and receive supporting documentation efficiently

“The Diamond-Trac® Streamline elevator system was developed to remove complexity from elevator projects without sacrificing performance or quality,” said Chris Cole, national sales and product director, Mitsubishi Electric US, Inc. Elevator & Escalator Division. “By pairing a simplified, pre-engineered solution with our new configuration tool, we’re helping customers move from concept to installation more quickly and with greater confidence.”

The Diamond-Trac Streamline MRL elevator system and the new Elevator Configurator Tool reflect Mitsubishi Electric's ongoing commitment to innovation, reliability, and customer-focused solutions for the vertical transportation industry.

Mitsubishi Electric US, Inc. Elevator and Escalator Division office locations include Cypress (Calif.), Oakland (Calif.), San Francisco, San Diego, Seattle, Honolulu, Las Vegas, Chicago, Dallas, Nashville, Tampa (Fla.), Boston, Washington, DC, and Miami.
