

## **Mitsubishi Electric US, Inc., Elevator and Escalator Division Introduces AT-MOD – Modernization for Elevators**

**CYPRESS, Calif., December 9, 2025** – The Elevator and Escalator Division of Mitsubishi Electric US, Inc., (Mitsubishi Electric), headquartered in Cypress, California launches AT-MOD modernization package, an advanced modernization solution designed to enhance building vertical transportation systems while preserving major existing components that may otherwise be prohibitively costly to replace.

The AT-MOD package allows building owners to improve the reliability, efficiency and performance of their elevators by integrating Mitsubishi Electric’s latest modernization technology with existing system components. This flexible approach provides a tailored solution for customers whose buildings may not allow or require a full elevator system replacement.

*“With the AT-MOD, we can deliver the performance that Mitsubishi Electric solutions are known for - advanced controls, fixtures and communications - while utilizing existing equipment, door operators and hardware where possible,” said Chris Cole, national sales and product director, Mitsubishi Electric US, Inc., Elevator and Escalator Division. “This approach reduces disruption, cost and lead time compared to a full system tear-out, while significantly extending the useful life and performance of the building’s vertical transportation systems by incorporating the high quality of Mitsubishi Electric components”.*

The AT-MOD package is well-suited for projects where a complete replacement may not be feasible due to building logistics, budget considerations or tenant impact. By focusing on flexibility, Mitsubishi Electric ensures that more customers can access modern elevator performance without compromising their unique building requirements.

While a full Mitsubishi Electric system remains the industry standard for quality and reliability, the AT-MOD package represents the next best option - delivering a high-value alternative solution that balances modernization benefits with cost and operational realities. The AT-MOD package reflects the ability to integrate seamlessly into a variety of existing building conditions. This flexibility allows Mitsubishi Electric to provide customized solutions that meet customers where they are, helping ensure long-term reliability, safety and passenger satisfaction.

Mitsubishi Electric US, Inc. Elevator and Escalator Division office locations include Cypress (Calif.), Oakland (Calif.), San Francisco, San Diego, Seattle, Honolulu, Las Vegas, Chicago, Dallas, Nashville, Tampa (Fla.), Boston, Washington, DC, and Miami.
